## Because we love horses...

### ...we accept responsibility.

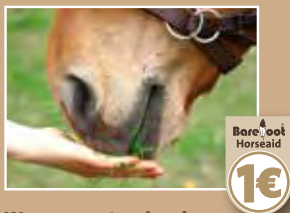

Responsibility means to us eg non inclusion of products in our range that could harm your partner horse in any way.

Our team of horse experts constantly develop new products according to their own ideas and customer suggestions. Our motto: Better for the horse and therefore better for the human as only a relaxed, pain free horse is motivated and therefore willing to perform.

You will not find any strong bits, spores or whips on the following pages but flexible saddles, bitless or variable bridles and practical, horse friendly accessories for training and fun with your horse.

We are also constantly in discussion with experts, not only for them to test and recommend our products but for them to contribute with their expertise, to change the handling of our horses, in which they show us how to treat a horse fairly according to nature.

We have also produced a series of brochures FOCUS horse, in which these experts pass on their valuable knowledge to you. Sponsored by us, therefore available absolutely free of charge because we take responsibility!

**We support animal rescue homes – assist us!**

When buying a product with this symbol, you automatically donate one Euro to the Barefoot Horseaid.

Barefoot founder  
Sabine Ullmann  
with Santiago

*„10 years Barefoot - how time flies! I look back with pride as we have achieved a lot. Many people already live by our philosophy ,for riders who care', but we still have more work to do. We will not tire on the way to better treatment of our beloved 4 legged friends. We are experiencing ourselves on a daily basis how much nicer it is to see and have a partner and friend, instead of blindly following some horsemanship and having to ,earn your spores' which, with a horse friendly motivated horse, often aren't even required.*

*Barefoot products are regarded as an impression, yes as a symbol of a horse friendly point of view because a rethink is long overdue. From horse friendly training, understanding of the being, the anatomy, different training methods - towards a holistic and anxiety free handling – with the partner and FRIEND horse.*

*A heartfelt thank you to all who are supporting my work on a daily basis and therefore contributing to making the world a more horse friendly place!*

*I can say with conviction: „We are on the way. Thank you for your trust!“*

# The Barefoot Saddle System

Healthy back due to our VPS® System

## Exchangeable pommel inserts

- Adjust saddle to shoulder width of your horse with minimal effort

## Saddle + Saddlepad = Saddle System

- With the help of shims fit saddle to different horse backs
- Also for difficult horse backs, sway backs etc
- Muscle build up after convalescence
- A saddle for use on more than one horse

## Velcro Stirrup Attachment

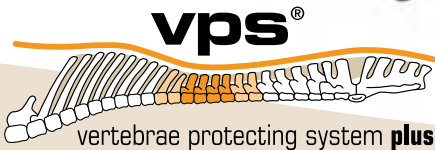

- Change leg & seat position as required

## V-Girthing

- The special girth system gives saddle additional stability on horse's back

Pictured: Barefoot Barrydale  
Description see page 4 and 5

- spinal clearance
- no weight limit
- no pressure points under stirrup bar
- weight distribution
- pressure & impact shock absorbing

## What does VPS® mean?

VPS® stands for 'Vertebrae Protecting System'.

It consists of a combination of different materials; some are more pressure absorbing, whilst others are more pressure distributing.

All components are totally flexible, therefore the saddle adjusts immediately to the movements of the horse and problems due to changes in the horse's conformation are eliminated.

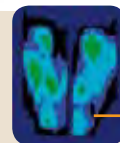

The VPS® System is not bulky and therefore allows an acutely close contact and communication between horse and rider.

## Why VPS® System?

Best possible weight distribution in the area which should carry the majority of the rider's weight – between the withers and the 15th/16th vertebrae.

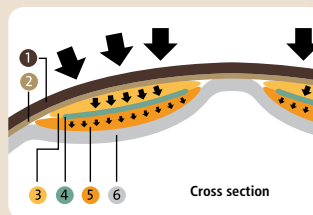

During rising and two pointing, the rider's weight is distributed over the entire footprint of the saddle – no limitation of the rider's weight.

The panel construction creates a reliable gullet and guarantees the constant protection of the horse's spine.

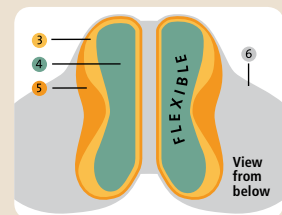

Pressure testing has shown, that this eliminates any punctual pressure.

Pressure testing Posting Trot, left handline Hand

## Components of the VPS® System:

- 1 top material (leather or DryTex™)
- 2 cushioning PU foam layer
- 3 shock absorbing Elastomer, layer 1
- 4 pressure distributing Polymer layer
- 5 pressure absorbing Elastomer, layer 2
- 6 equalizing fleece lining

Very elastic 'sandwich construction' made of shock absorbing Elastomer layers and a pressure distributing Polymer layer.

All materials consist of a smooth surface and have levelled edges. We do not use upholstery material which could decompress unevenly and create an uneven pressure distribution.

The fleece lining of the saddle creates a soft underside which can compensate for any minor unevenness.

# Barrydale

now also available in Black

## STRETCH & BREATH®

Products from the Barefoot range Stretch & Breath® are particularly comfortable for the horse:

The highly elasticated material used allows the horse to breathe, the rib cage can expand whilst saddle sits perfectly.

Girth are tear-resistant and will not loose shape.

5 | Girth Stretch & Breath®

**NEW**

5 | Girth Stretch & Breath®

The material for the Stretch & Breath® girth is specially made for us. It consists of many adjacent, fine elastic band envelopes, stitched with tear-resistant nylon thread. This gives us a material which is tear-resistant but also totally stretchy. The Stretch & Breath® material is then wrapped with a soft, adjustable neoprene case that protects the horse's sensitive girth area. Advantages of the Stretch & Breath® girth at a glance:

- completely elastic: the horse's breathing chest movement is not restricted
- Safety: with finely woven, tear-resistant nylon material
- Soft coated with neoprene
- backed roller buckles at both ends
- central ring for attaching martingale or breastplate
- The entire girth is machine washable

Length in cm: 35, 45, 55, 65, 75, 85

- spinal clearance
- no weight limit
- no pressure points under stirrup bar

1 | Barefoot Barrydale

### 1 | Barefoot Barrydale

The anatomically shaped, duo coloured, soft Nubuck leather knee rolls, incorporated in the detachable seat of this Barefoot® Saddle, frame the rider to allow for a deep and very secure seat whether out hacking or in the arena. The Barefoot ‚Barrydale‘ is particularly popular with Endurance Riders – strenuous up and down – no problem with this saddle. Your legs are precisely positioned, the saddle stays secure, the horse’s back pressure free – a must especially on long distance rides.

The stirrup bar can be freely positioned between saddle & seat to suit your preferred seat position & your size.

Flexible, V-Shaped girthing system. The saddle is also suitable for difficult girthing positions. It lies a little further forward than conventional saddles, therefore positions the rider directly above the horse’s center of gravity.

Your horse will find it easier to balance your weight.

With this saddle you will feel your horse’s muscles work and the movement of its back, the basic requirements for more advanced riding.

9D-Rings to secure saddle pad or luggage.

The exchange pommel will be delivered in size middle as standard. You may easily exchange the pommel size – find more info on page 31.

- flexible in all 3 dimensions (X,Y,Z)
- no pressure therefore no restriction to muscle build up
- movable stirrup bar
- flexible V-Shaped Girthing System
- with VPS® System (see page 3)
- large, anatomically shaped knee rolls
- weight only approx. 6 kg

1 | Barefoot London

Matching stirrups and stirrup leathers see page 38 and 39.

2 | Devon Bridle, english style

3 | Anti-Slip Reins Super-Grip

## 2 | Devon Bridle, english style

This English bridle is designed according to the Barefoot's philosophy 'for riders who care'.

Browband, crown piece and noseband are all softly padded also including the areas behind the buckles. The padding is made of calfskin leather with neoprene fill which will avoid that too much pressure is put on to the poll and nasal bone of the horse. The padding is wider than the narrow and flat leather top which makes this bridle very flexible and avoids skin irritations and friction to the sensitive areas on the horse's head. The crown piece is embedded in a wide and soft padding to protect the sensitive area behind the ears and to take the pressure off the first cervical vertebrae.

In order for this bridle to be truly horse friendly, we did not include a flash noseband. We consider flash nosebands as unnecessary. Any horse that trusts the rider's hand won't open the mouth unless it has dental problems or doesn't like the bit. If your horse has issues with the bit, we recommend to address those with regular dental check ups or by changing to a bitless bridle – we advise against any equipment that forces the horse's mouth shut.

Pony size also available in two tone colours, see page 27.  
Size 0: Pony, Size 1: COB Size 2: FULL

Black Art.No: BRID-DEV

## 3 | Anti-Slip Reins Super-Grip

Special material with weaved through rubber. Stay securely in the rider's hands without slipping even in rain and are non-stretch.

# London

vps 0 1 2 2.5 cm

1 | Barefoot London

With stirrup attachment which can be positioned as needed, plus flexible V-Rigging and knee rolls which can be adjusted via Velcro.

Dressage cut saddle made of soft cow hide designed with your horse's comfort in mind. The long saddle flap positions the rider's leg in an open dressage seat which will not lock the rider into a fixed position. The saddle provides the deep seat and close contact contact feel typical for the Barefoot. The London will enable you to feel your horse's muscles and movements which provides the foundation for very refined riding.

Black, thick fleece underside. Padded knee flap. Comes with 2 pairs of knee rolls (different sizes) and can be velcroed to the saddle according to your individual needs. This saddle is also very suitable as a trail saddle and comes with 6 D-rings to attach all your travel/riding needs. The fiberglass insert (medium size) can be exchanged as with all Barefoot Saddles. Double stitched leather on all weight bearing parts.

The exchange pommel will be delivered in size middle as standard. You may easily exchange the pommel size – find more info on page 31.

- flexible in all directions
- promotes the development of a good topline
- with VPS® System (see page 3)
- close contact feel for refined riding
- weight only approx. 5 kg
- recommended saddle underlay: Barefoot Physio or Barefoot Special (see page 28 and 29)

Bitless Bridle  
see page 48

2 | Horse Boot  
Air-Flow  
Front  
(pastern/fetlock)

# Lexington

## 1 | Barefoot Lexington

Exclusive and innovative saddle in the classical Dressage design manufactured with soft Nubuck with stirrup attachment which can be positioned as needed, plus flexible V-Rigging, wedge-shaped bolster underneath the seat and knee rolls which can be adjusted via Velcro.

This saddle lets the rider feel every movement of the horse's back and his muscles – thus creating a sound foundation for subtle riding.

The stirrup attachment can be positioned as needed – therefore the saddle can easily be adjusted to your personal needs and measurements.

The ‚Lexington‘ is equipped with a wedge-shaped VPS® padding, raising the seat in the rear and thus enabling a straight position for the rider, which is even further supported by the distinct knee roll.

The rigging is flexible and runs in a V-form, allowing the saddle to be cinched straight even when the girthing area is difficult. Compared to standard Dressage saddles, the ‚Lexington‘ is placed further to the front, positioning the rider directly above the horse's centre of gravity. The horse can more easily balance the rider's weight.

Thanks to the long and slightly wider flap with formed knee rolls, the rider's leg is securely positioned in a dressage seat. Underneath this support, additional knee rolls – which are included in two different sizes – can be placed as desired thank to Velcro fastening.

1 | Barefoot Lexington

Furthermore, the knee roll support is equipped with AirPumpSystem – air can circulate allowing the knee roll to conform to the rider's leg even more softly.

This saddle ensures proper support even when hacking-out; therefore it comes with 6 D-Rings to attach saddle blanket and luggage.

The exchange pommel will be delivered in size middle as standard. You may easily exchange the pommel size – find more info on page 31.

- flexible in all three dimensions (X, Y, Z)
- no peak pressure on thus no reduction of back muscles

- stirrup attachment can be positioned as needed
- wedge-shaped VPS® System (see page 3)
- flexible V-Rigging
- AirPump-System
- adjustable knee rolls
- enhances subtle style of riding thanks to placing the rider close to the horse
- weight only approx. 6 kg

Skirt length S or L.

2 | Horse Boot Air-Flow

Back (pastern/fetlock)

## 1 | Horse Boot Air-Flow

The Barefoot ‚Air-Flow‘ Boot lets the horse's leg breathe!

The air-permeable, soft and pliable inner padding offers ideal protection for horse's legs without constraining blood circulation. The padding overlaps the edges of the outer shell to avoid pinching. The outer shell is made from clear sturdy TPU\* to protect the bones ideally. Elastic tapes keep the boot in place and allow quick mounting and taking off.

- ideal horseleg protecting
- especially soft inside padding
- excellent protecting
- ultra light weight

Sizes: M ( height 23 cm) and L (height 25 cm)

Front (pastern/fetlock) Art.No: BOOT-AF-FRONT

Back (pastern/fetlock)

Art.No: BOOT-AF-BACK

## 3 | Soft-Leather stirrup leathers

- no bothersome pressure along the thigh
- numbered oval holes
- no distortion due to nylon inlay
- soft and without sharp edge

Length: 130 cm, 145 cm

Black Art.No: SL-SOFT

\*TPU = Thermoplastic Polyurethan offers the following attributes: flexible along a wide range of temperatures, low wear and tear, bendproof and tearproof, resistance against oil, fat and solvents, weatherproof.

## JustAdjust

NEW

**Innovation:**  
Size adjustable saddle

**Support giving thigh blocks**

- freely adjustable

Non-slip suede seat

Movable stirrup bar

- individually adjustable

«Innovation»  
New to the horse market

Removable seat part

- allows for size adjustment

### 1 | Barefoot JustAdjust

Innovation: The ‚JustAdjust‘ from Barefoot – a size adjustable saddle!

The cantle of the Barefoot Saddle model JustAdjust is removable and can be freely positioned via a velcro system. You can therefore adjust the seat size of the saddle to suit each individual rider.

The Barefoot JustAdjust provides knee rolls for a secure seat and movable stirrup bars which can both be positioned depending on rider's size and preference. The saddles variable structure and VPS® System will also adjust to the respective horse it is used on.

You cannot get any more flexible than this!

### 1 | Barefoot JustAdjust

Matching stirrups and stirrup leathers see page 38 and 39.

The Barefoot ‚JustAdjust‘ is ideal for riding schools, RDA Centers or private yards where riders are sharing a saddle. Also perfect for riders who are changing shape: i.e during pregnancy or diets. The saddles offers sufficient support and security even for insecure riders. The closeness of saddle/rider to the horse makes following the horse's movement much easier and ensures faster, more enjoyable learning.

6 D-rings to attach saddle pad and/or luggage.

Black fleece underside.

- adjustable seat size
- movable stirrup bar
- flexible in all 3 dimensions (X,Y,Z)
- no pressure so therefore no restriction to muscle build up
- with VPS® System (see page 3)
- close contact, free and comfortable seating at the horse's center of gravity
- recommended saddle underlay: Barefoot Physio or Barefoot Special (see page 28 and 29)

The exchange pommel will be delivered in size middle as standard. You may easily exchange the pommel size – find more info on page 31.

The saddle is made from easy-care DryTex™ and comes with a non-slip suede seat.

Please select saddle pad ‚Cheyenne‘ for the JustAdjust.

LIMITED EDITION  
**Barefoot**  
riders<sup>1</sup> who care

No only stunning but our saddle model Notting Hill is also equipped with a 3-Layer VPS® System. This saddle is a limited edition – only available while stocks last!

Juniper Halter 3-in-1 see page 56

1 | Barefoot Notting Hill

Matching stirrups and stirrup leathers see page 38 and 39.

1 | Barefoot Notting Hill

Padded knee pads; underlying blocks can be freely positioned depending on rider preference.

## 1 | Barefoot Notting Hill Limited Edition.

The 3-Layer VPS® System ensures even more protection from pressure under the stirrup attachment. Therefore this saddle is not only suitable for jumping but also for riders who are heavier in the saddle, long treks and other strains. Nevertheless, the saddle will still be flexible ensuring the horse's comfort and not restricting his movements.

Muscles will build up rather than waste away!

Natural coloured, thick fleece underside, 6 D-Rings. Padded knee pads: underlying knee blocks can be freely positioned (velcroed) depending on riders preference.

- flexible in all 3 dimensions (X,Y,Z)

- no pressure and therefore no restriction to muscle build up
- moveable safety-stirrup attachment
- with 3-Layer VPS® System
- flexible V-Rigging
- adjustable knee rolls
- close contact seat over the center of gravity of the horse
- weight only approx 5 kg
- recommended saddle underlay: Barefoot Physio or Barefoot Special (see page 28 and 29)

The exchange pommel will be delivered in size middle as standard. You may easily exchange the pommel size – find more info on page 31.

This saddle is made from chocolate coloured soft leather - in combination with almond coloured, easy care DryTex™ material.

Please select saddle pad ‚Cherokee‘ for the Notting Hill.

- adjustable knee rolls
- close contact and comfortable, balanced seat in alignment with the horse's centre of gravity
- weight only approx. 5 kg

- recommended saddle underlay: Barefoot Physio or Barefoot Special (see page 28 and 29)

The exchange pommel will be delivered in size middle as standard. You may easily exchange the pommel size – find more info on page 31.

**Brown/Black**  
Art.No: CKE-01/02

## Mindset

The Barefoot saddle system allows for muscle build up as it adapts to the anatomy, movement and changes of the horse's back and it also absorbs pressure.

Back muscles will build up and the horse can use this new strength to carry a rider. It allows the horse to loosen up and achieve better results in sport and leisure.

Amber  
Bridle 2-in-1  
see page 50

### 2 | Barefoot Cheyenne

Matching stirrups  
and stirrup leathers  
see page 38 and 39.

### Barefoot Cheyenne

Our favorite all around saddle made of open pore cow hide, very pliable and adjustable on the horse's back. Robust and easy to take care of due to its dirt repellent surface treatment.

This model is a favorite among riders who want to have to most freedom in their seat. The saddle adjusts to the horse's back and the rider's leg can swing freely; there is no restriction of a knee flap.

Thick fleece underside and leather trim.

6 D-rings to attach all your travel/riding needs.

The exchange pommel will be delivered in size middle as standard.

You may easily exchange the pommel size – find more info on page 31.

- flexible in all 3 dimensions (X,Y,Z)
- no undue pressure under saddle and therefore supports the development of a good topline
- with VPS<sup>®</sup> System (see page 3)
- close contact and comfortable, balanced seat in alignment with the horse's centre of gravity
- recommended saddle pad:  
Barefoot Physio pad or  
Barefoot Special pad

### 1 | Barefoot Cheyenne Leather

Open-pored Nubuck leather, very soft and moulds to the horse's back.

Hard wearing and easy-care thanks to a dirt-repellent top coat. Very long lasting. Light, dense fleece underside, leather binding.

**NEW**

1 | Communication Neck Ring

## 1 | Communication Neck Ring

Barefoot – Designed FOR Horses

Super ring for aids from the saddle or also for groundwork. Plaited, sturdy, easy care DryTex™ material.

We have added a center patch which gives the ring weight and therefore helps to balance it. The ring lies with the patch against the horse's chest and balanced itself. Through the wider patch reverse acting aids are optimally transferred to the sternum. The patch also looks chic - is braided and decorated with a concha.

The ring is also suitable for beginners to hold on to, seat exercises on the lunge or timid riders - in addition to bridle and saddle.

By the way: A neck ring is used in Western riding for neck reining, that is: The horse yields to pressure - e.g. the ring applied to the right hand side of the neck and horse gives way to the left and turns into that direction. Communication can be so simple and fine!

Thickness plaited material: approx. 12 mm  
Length ring: 150 cm  
Material: DryTex™

Art.No: Art.No: COM-RING-150-02

## 2 | Variable Breastplate

This breastplate is made from high quality, soft and flexible leather. The brown and natured coloured breastplate is adorned with handmade basket tooling, the black breastplate shows a noticeable stitching. The part close to the horse is padded with softleather all over - even more padded with thermoelastic foam, which allows easy conforming to the horse's breast. The padding overlaps slightly and is rounded off carefully to prevent shaving.

**INTELLIGENT FITTING:** This breastplate can be attached and easily fitted to every saddle because it offers two ways of fastening: both 2 leather ties and 2 snaps come with it.

- supersoft padding with thermoelastic foam
- handmade tooling or embroidery
- easy adaptation thanks to leather ties and snap hooks

NEW

2 | Support Fender with knee roll

### 2 | Support Fender with knee roll

Our Support-Fender with integrated knee rolls not only offer more security - hacking out or during schooling; but the rider also sits more comfortably. The knee area is raised through soft rolls and support the rider's knee contact.

Leathers can be pulled through a hollow space within the fenders. Leathers are not included.

Innovative feature: You can use standard width or wide leathers (max 5cm) with fenders allowing you the choice of your preferred stirrups.

- rider's leg lies quieter against the saddle
- can also be used with English stirrups
- knee rolls support the seat and give security
- no direct contact of clothing with horse
- you can ride without boots or chaps
- suitable for all saddles without knee rolls

Ideal for Barefoot Cheyenne or Barefoot Atlanta and Arizona.

Material: Real Leather

# Nevada

1 | Barefoot Nevada

Matching fenders and stirrups see page 38 and 39.

4 | Oaklet Reins  
Brown Art.No: REIN-OAK-02

## 1 | Barefoot Nevada

With stirrup attachment which can be positioned as needed!

Horse friendly western saddle made of robust, open pore cow hide, especially pliable to mould around your horse's back and very comfortable for the rider. Dirt repellent surface treatment, leather trim. Light colored, thick fleece underside, 6 D-rings, conchas and leather strings to attach your travel/riding needs. Square skirts will provide more stability on big framed, wide and round horses with flat withers.

The English billet system provides improved lateral stability for thick bellied horses with a forward girthgrove.

- flexible in all 3 dimensions (X,Y,Z)
- promotes the development of a good topline
- with VPS® System (see page 3)
- Ideal for broad backed horses
- weight only approx. 7 kg

- recommended saddle underlay:  
Barefoot Physio or Barefoot Special  
(see page 28 and 29)

The exchange fork will be delivered in size middle as standard. You may easily exchange the pommel size – find more info on page 31.

Matching fenders and stirrups see page 38 and 39.

## 2 | Barefoot Arizona Nut

The saddle comes including matching fenders and with leather covered and tooled stirrups.

## 1 | Barefoot Arizona

With stirrup attachment which can be positioned as needed! Horse friendly western saddle made of robust, open pore cow hide, very pliable and moulds to the horse's back, comfortable for the rider. Very deep seat – near to horseback! Short, round skirts, very good saddle positioning for short horses and horses with higher withers. Dirt repellent surface treatment, leather trim, 6 D-rings, conchas with leather strings, western rigging. Matching wide fenders and stirrups available separately. The saddle comes with off billet and tie strap (nylon).

**Black** Art.No: AR-01  
**Brown** Art.No: AR-02

## 2 | Barefoot Arizona Nut

Horsefriendly westernsaddle made from Brazilian calf leather, crafted and tooled by hand in small basket design. Very deep seat - near to horseback! Very adjustable and flexible on the horse, comfortable for the rider. Short round skirts to accommodate short backs, also for use on horses with slightly higher withers.

6 d-rings, conchas with leather strings, Western Rigging including Tie Strap and Off Billet (Nylon).

Including fenders and stirrups. Chocolate oiled  
Art.No: AR-NUT-02

### The following applies to both models:

- flexible in all 3 dimensions (X, Y, Z)
- no pressure points and therefore no restriction to muscle build up
- with VPS® System (see page 3)
- ideal for short-backed horses
- very comfortable on long rides
- weight Arizona: approx 6 kg  
Arizona Nut : approx 4.5 kg
- recommended saddle underlay: Barefoot Physio or Barefoot Special (see page 28 and 29)

The exchange fork will be delivered in size middle as standard. You may easily exchange the pommel size – find more info on page 31.

## Arizona Nut

1 | Sevilla  
Vaquero  
Bridle

2 | Madrid

Included:  
2 browbands

1 | Sevilla  
Vaquero  
Bridle

## 1 | Sevilla Vaquero Bridle

Comfortable and authentic Vaquero bridle made of durable, vegetable tanned, brazilian leather of best quality. Crown piece, noseband and browbands are lightly padded. This will make the bridle comfortable for your horse while providing the authentic Spanish look.

The browband with its Frontaleras (soft leather bands) offers protection from flies. The integrated Pinas are made of raw hide. If you don't like the moving Frontaleras for every day riding you can exchange it for a padded browband without Frontaleras (included with this bridle). It has embroidered leather Pinas.

The bridle is sold complete with matching leather reins, those have typical flat Spanish style ends and are decorated with high quality raw hide.

- brazilian leather
- adjustable on both sides
- 2 softly padded browbands
- spanish hardware and decoration
- reins included

Rein length - measured one sided: approx. 170 cm.

## 2 | Barefoot Madrid

The Barefoot saddle for classical riders!

Our Barefoot model ‚Madrid‘ is optically made for classical riding, but not only does it look right it also allows for a deep, secure seat.

Closeness to the horse is noticeable: Your horse's working muscles and movement of the back are transmitted unlike with any other saddle of this type and therefore build the basis of more precise riding.

At the same time the horse's back remains free of pressure. Demanding lessons, collections, transitions: Your horse can learn free of tension

and build topline without any restriction by the saddle. There is no saddle pressure to stop your horse from moving freely. Blood supply to muscles remains intact and muscles can therefore build up.

The stirrup attachment can be positioned between seat and saddle as needed. Therefore saddle easily adjusts to your seat and size. Flexible V-Rigging. Saddle also suits horse's with difficult girth positions. Saddle lies a little further forward than a conventional saddle and positions the rider at the horse's center of gravity. It is therefore easier for your horse to balance the weight of the rider, the basis for lessons of any kind.

The seat is removable through velcro and can be exchanged with a real sheep wool seat. The sheep wool seat has integrated knee rolls and can be purchased separately.

The Barefoot Madrid is made from two different types of genuine leather: Soft, supple, non-slip suede with integrated padding for the seat and sturdy, smooth leather (South American quality) for the rest of the saddle.

6 D-rings to attach saddle pad etc.

The exchange pommel will be delivered in size wide as standard. You may easily exchange the pommel size – find more info on page 31.

Size Kids/Pony

## Special

including  
shims

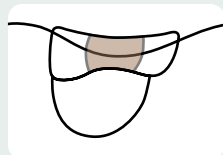

### Balancing Barefoot Saddles through the saddle pad:

A saddle should always sit level on the horse's back.

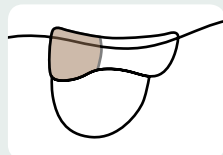

The Barefoot Saddle System can easily be balanced – should your horse's conformation make this necessary – by adding padding to certain areas of saddle pad inside the pockets of our saddle underlays.

To shim the saddle pad is very straight forward.

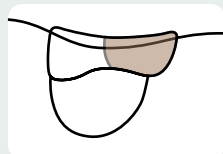

Here are some examples of how to use the extra padding:

Problematic situation:  
Sway back

Problematic situation:  
Saddle is dipping forward

Problematic situation:  
Saddle slips back

1 | Barefoot Special Saddle Pad

Model  
Cherokee/Notting Hill

### 1 | Barefoot Special Saddle Pad

Specially designed for our Barefoot Saddles, in different shapes and colors for all saddle models.

The Special saddle Pads are cut to the shape of our saddles. They are contoured to accommodate the horse's withers and have a split over the wither area to avoid rubbing and compression. Anatomically formed, removable inserts generate good spinal clearance and guarantee ideal pressure absorption and distribution.

Even more comfort and cushioning is achieved by the pure wool underside which provides temperature regulation and moisture absorption. There is no fleece lining right over the spine to provide additional clearance for the spine and spinous processes. All saddle pads have Poly cotton padding inside and the top layer is made of tough and durable quilted cotton. All pads come with velcro straps to attach to the saddles' d-rings.

- anatomically shaped pad
- fleece underside with wither and spine relief
- spinal clearance
- improved the weight distribution
- ideal shock absorption
- moisture absorbing

Pads can be machine washed at 30 degrees (delicate cycle) with wool detergent.

Available in different shapes and colors for all our Barefoot saddle models (please place order accordingly).

Black Art.No: SP-01  
Brown Art.No: SP-02

### 3 | Inlays for Saddle Pads

Available in three different materials.

PU-Foam inlays  
Art.No: INLAY-PAD-PUR

Rubberfoam inlays  
Art.No: INLAY-PAD-MOOS

Memory Foam  
Art.No: INLAY-PAD-MEMORY

- cut after your horses need

### 4 | Inlay Heavy Duty

- Inlay for your Saddle Pad
- heavy duty: for heavy riders, trail, endurance or others

Barefoot Saddle Pad Shims Heavy Duty were developed for the extreme.

They are not only shock absorbent but also distribute weight evenly through a polyurethane plate inserted into the cellular rubber.

# Physio

including two pairs of shims

Model Nevada/Madrid

## 2 | Barefoot Physio Saddle Pad System

### 2 | Barefoot Physio Saddle Pad System

Available in different shapes and colors for all our Barefoot Saddle models. Developed for the demands during long rides, for heavier riders, round horses on which every saddle tends to slip or horses with protruding spinous processes. All physio pads are shaped to accommodate the horse's spine and offer ideal pressure absorption and distribution.

This system offers additional clearance and lift over the spinous processes of the thoracic vertebrae and consists of 2 components which are pressure absorbing and are connected securely with velcro.

**a.** Lower part:

Anatomically cut made of quilted cotton, thinned under the upper thigh for a close leg contact, pressure absorbing foam inserts can be removed through an easy velcro opening.

2/3 gripping sympanova underside will stabilize the saddle even on very round horses – the rear 1/3 is made out of real sheepskin to protect this sensitive area. The sheepskin glides over the horses coat and therefore eliminates potential rubbing under the cantle.

**b.** Top layer:

Quilted cotton upper fabric with felt underside, poly fleece inside and foam layer on top (will keep the saddle in place and supplies additional pressure absorption).

Velcro straps attach to the saddles D-rings.

Machine washable at 30 degrees.

1 pair of 15 mm foam inserts are included with this saddle pad.

- anatomically cut
- supplies spinal clearance even for horses with atrophied spines
- well cushioned, suitable also for heavier riders
- non-slip

**Black** Art.No: PH-01  
**Brown** Art.No: PH-02

Available in different shapes and colors for all our Barefoot saddle models (please place order accordingly).

Model Cheyenne/JustAdjust

Model Barrydale

Model London/Lexington

Model Missoula Nut/Virginia Rose

Model Atlanta/Arizona

The edges of the inserts are softly rounded and tapered to ensure no developing pressure ridges even on long rides.

These inserts are recommended for long distance riders and also for pressure sensitive horses who have previously suffered from saddle pressure sores.

Thickness: 20 mm  
Art.No: INLAY-PAD-HEAVY

- **Pointer:** These inserts **cannot be trimmed** due to the inlaying plate therefore we continue to recommend the foam, rubber or memory inserts to fine tune saddle fitting.

## 1 | Barefoot Physio Trailpad

2-in-1 Pad – for daily usage and for attachment under luggage.

Delivery including 2 different pairs of inserts!

Developed for the demands during long rides, with detachable attachment to protect when using saddle bags. The attachment is lined with real sheep fur, which protects the horse and diverts rubbing. Thanks to Velcro fasteners it can easily and quickly be detached so the pad can also be used without it for every day use. This saves you from obtaining two different saddle pads.

The Barefoot Physio Trailpad can be used with all Barefoot® Saddles, but it is also smart to be used under conventional saddles because of its functions:

All Physio Trailpads are shaped to accommodate the horse's spine and offer ideal pressure absorption and distribution.

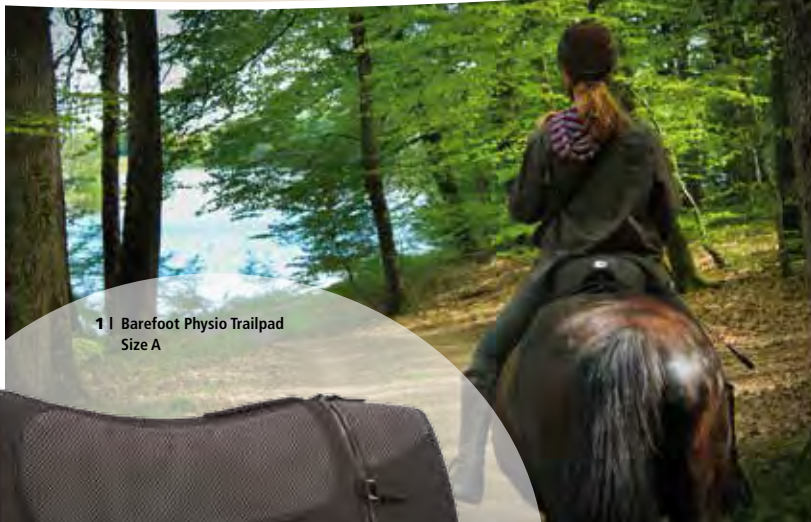

This system offers additional clearance over the spinous processes of the thoracic vertebrae and consists of 2 components which are pressure absorbing and are connected securely with Velcro.

### a. Lower part:

Anatomically cut made of quilted cotton, thinned under the upper thigh for a close leg contact, pressure absorbing foam inserts can be removed through an easy Velcro opening. 2/3 gripping sympanova underside will stabilize the saddle even on very round horses – the rear 1/3 is lined with sheep fur to protect this sensitive area. The fur glides over the horses coat and therefore eliminates potential rubbing under the cantle. Additional sheep fur in the front to cushion the movement of the shoulder.

### b. Upper layer:

Quilted cotton or microfiber fabric with felt underside, poly fleece inside and sympanova layer on top (will keep the saddle in place, supplies additional pressure absorption and offers some air circulation). Velcro straps to attach pad to the saddle.

1 | Barefoot Physio Trailpad  
Size A

Barefoot Physio  
Trailpad  
underside

- with detachable attachment
- anatomically shaped
- supplies spinal clearance even for sensitive horses with visible spinous processes
- well cushioned, suitable also for heavier riders
- non-slip
- including two different pairs of inserts
- washable at 30 degrees

Available in two different layouts:

**Size A** Topside: black cotton material for all saddles with longer saddle flaps, such as Barefoot Model Barrydale, London, Lexington, Cheyenne, Cherokee, Nevada, JustAdjust, Madrid

**Size B** Topside: brown microfiber material for all saddles with short side jockeys, such as Barefoot Model Atlanta, Arizona, Missoula Nut, Virginia Rose.

2 pairs of 15 mm anatomically trimmed foam inserts are included with this saddle pad: Soft (PU-Foam) - adapts well; dense (rubberfoam): for heavy riders see page 28.

# Exchange Pommels

All Barefoot Saddles can be adjusted to suit horses with different shoulder conformations.

Easy fitting: open front zipper, exchange pommel inserts, close zipper – finished!

How to correctly change the front pommel: Find detailed instructions here:

[www.barefoot-saddle.com/de/out/pictures/wysiwigpro/pdf/instruction-front-pommel.pdf](http://www.barefoot-saddle.com/de/out/pictures/wysiwigpro/pdf/instruction-front-pommel.pdf)

Easy to adjust on your horse's shoulder

## 1 | Exchange Pommels

- change without trouble
- adopt to your horse's shoulder yourself
- easy saddle fit to different horses and training steps

Size XXL Art.No: FG-XXL  
Size Wide Art.No: FG-WI  
Size Narrow Art.No: FG-NA

## 2 | Exchange Fork

Exchangeable fork for all Barefoot Saddles with horn.

Size Middle or XXL:

Black	Art.No: FO-01
Brown	Art.No: FO-02
Chocolate oiled	Art.No: FO-MISU
Light oiled	Art.No: FO-VIRG

## 3 | Barefoot Soft Inlay, cotton

The fiberglass pommel insert can be exchanged with this soft insert. Made of a cotton sleeve filled with cotton wool. This insert is as soft as a stuffed toy and is flexible in all directions. We recommend this product for all horses with a sensitive shoulder/wither area.

Normal size: for saddles 0, 1, 2  
Size XO: only pony saddle

Art.No: SOFT-EIN

### Recommended sizes for your horse's shoulder

**XXL:** for horses with extremely wide shoulders (coldbloods)  
**Wide:** for horses with wide shoulders and no significant withers  
**Middle:** for narrow horses  
**Narrow:** for very narrow horses

Determine the correct size with our Shoulder Measurement Templates

## 5 | Barefoot Shoulder Measurement Templates

Fit your Barefoot Saddle securely and easily to your horse's shoulders!

With the help of the shoulder measurement templates you can easily determine whether the pommel insert placed inside the saddle fits your horse. We provide a set of 4 different templates (4 sizes).

To avoid any confusion, the templates are coloured to match the exchange pommel inserts.

**Recommendation:** Please select the wider size should your horse fall in between two sizes to allow room for muscle build up.

## 4 | Saddle Horn, Velcro

Saddle horn for decoration. Best in combination with Barefoot Soft-Inlay. Attachable by Velcro.

Black Art.No: HORN-01  
Brown Art.No: HORN-01

**Please note:** The Barefoot Exchange Pommels are in itself elastic. The material therefore intentionally adjusts to movement. Small deviations between template and shoulder width are therefore easily offset.

Material: firm cardboard, laquered  
Art.No: TEMPLATE-SET

Alternatively you can still use our DIY downloadable templates for free:

[www.barefoot-saddle.com/de/out/pictures/wysiwigpro/pdf/measuring\\_template.pdf](http://www.barefoot-saddle.com/de/out/pictures/wysiwigpro/pdf/measuring_template.pdf)

# Saddle Seat from sheepskin and sheepwool

## 1 | Barefoot Saddle Seat, 100 % sheepskin

Seat replacements made of real, soft and cosy sheepskin especially manufactured for our Barefoot Saddle models.

These seat replacements do not slip as they are attached via Velcro to the saddle. The entire leather seat is replaced for the sheepskin one.

Ideal for riders which are sensitive and others who just want to be extra comfortable in the saddle.

- ideal pressure absorption
- warm in winter, cool in summer
- temperature regulating
- moisture absorbing

All seats in sizes 1 and 2.

Colours: Black for saddles London and Cherokee. Natural for all other saddle.

Please order seat model London for Cherokee Classic saddle model!

Art.No: SHEEP

Especially made for the different Barefoot saddle models

## 2 | Saver from Sheepwool

## 2 | Saver from Sheepwool

Can be used as a nose, neck, jaw or chin guard and is simply velcroed on the relevant part of the bridle. Annoying disassembly of the entire bridle is unnecessary.

Of course, you can use the saver for your stable or pasture halter, too. Soft and anti-bacterial

sheepwool base, soft cushioned and a quilted top. No „bulky“ look.

Width: 6 cm, Length: 28 cm

Black, Wool Natural  
Art.No: SW-BRID/HALT-COVER

## 3 | SheepWool Seat Cover

4 | Covers made of SheepWool

## 3 | SheepWool Seat Cover

The Barefoot seat cover can be used with all Barefoot saddles. The saddles are even more comfortable and really cozy. This cover will also fit many traditional Western Saddles - just order a size 2!

The seat cover is easily attached by two Velcro strips on the left and right sides of the saddle seat. There is a bulge on the back of the cover that is stretched over the seat back. After a short ride the seat cover molds to the saddle. The Sympanova on the underside of the seat pad prevents it slipping, so the rider feels safer with a softer seat at the same time.

- soft seat
- pressure absorbing
- easy attachment

Natural SW-SEAT-COVER

NEW

## 4 | Covers made of SheepWool

Our sheep wool covers wrap stirrup leathers or breastplates and are so soft and protective. They are secured with Velcro for quick and easy placement and removal.

- for stirrup leathers or breastplates
- dont pinch the riders leg
- no rubbing of the leathers to the saddle

Natural SW-SL-COVER

NEW

5 | Sheepwool Seat with blocks

Barefoot Ride-On-Pad see page 34

Seneca Riding Halter 3-in-1 see page 54

## Mindset

### We care!

This product was made from pure sheep's wool.

Sheep's wool has similar anti-bacterial and pressure absorbing qualities as sheepskin but for us there is an important difference:

To obtain sheep's wool, sheep are simply shorn and not slaughtered as required for the production of sheepskin. The sheep's wool is applied to a textile carrier material and processed.

Therefore the production is animal and resource friendly.

NEW

suitable for the Barefoot Ride-On-Pad

4 | Sheepwool seat with blocks

The Sheepwool seat with blocks is suitable for the Barefoot Ride-On-Pad without pockets and the Ride-On-Pad Physio

Ride-On-Pads see page 34

### 5 | Sheepwool Seat with blocks

This seat makes your Ride-On-Pad a ‚cuddly-safe‘ experience!

The seat has thick front left and right blocks to contain the riders thigh. At the back there is a high and comfortable back support. This gives the rider a sure seat while sitting very comfortably.

Made from 100% sheep wool with a non-slip underside of Sympanova, which rests safely and smoothly on the Ride-On-Pad.

The seat is attached by a long Velcro strap that is fastened on the underside of the ride-on pads. The seat has little additional openings front and rear through which the rings of the Ride-On-Pads can be drawn.

- with knee rolls
- comfortable back support
- seat is attached by a long Velcro strap

Art.No:  
SW-RIDE-ON-SEAT

## 1 | Barefoot Ride-On-Pad

Riding without a saddle is now possible without harming your horse!

Most bareback pads or riding cushions are rather bad for the horse and cause discomfort rather than comfort, because the girth runs directly across the back and distributes all pressure onto one, maybe two spinous processes.

The Barefoot Ride-On-Pad has a v-girthing which distributes the pressure along the entire pad. We deliberately decided against stirrup attachments as standing in stirrups would lead to pressure points.

The Barefoot Ride-On-Pad is padded with high density foam in alternating thickness and is very stable on the horse's back due to the Sympanova material on the underside. The upper side is made from microfiber which ensures good grip for the rider even at speed. The girthing is stabilized by patches, which have real sheep wool on the underside so the girthing does not irritate the coat along the horse's side.

- 3 D-rings to attach bags
- Grab handle made from sturdy nylon
- Horse friendly girthing
- Slip-proof underside

## 2 | Barefoot Ride-On-Pad Physio

The Barefoot Ride-On-Pad Physio has a special, paddable, velcroed-on underside. It comes with 2 different sets of shims (Rubber Foam and soft PU Foam) which can be inserted into the underside of the pad.

The shims ensure spinal clearance and additional protection of the horse's back.

We therefore recommend the Barefoot Ride-On-Pad Physio for:

Older horses, horses with visible spinal processes and badly muscled backs, heavy riders, extremely slim riders.

Most bareback pads or riding cushions are rather bad for the horse and cause discomfort rather than comfort, because the girth runs directly across the back and distributes all pressure onto one, maybe two spinous processes.

The Barefoot Ride-On-Pad Physio has a v-girthing which distributes the pressure along the entire pad. We deliberately decided against stirrup attachments as standing in stirrups would lead to pressure points.

- comes with 2 different sets of shims
- qualified for older horses
- qualified for heavy riders
- horse friendly v-girthing
- slip-proof underside with Sympanova
- D-rings to attach bags
- weight only approx. 3 kg

« Innovation »  
New to the  
horse market

Bareback pad with shimmable underside.

The Barefoot Ride-On-pad Physio was developed especially for difficult to fit horse backs.

Even old horses, poorly muscled horses or horses in convalescence can be ridden with the Barefoot ride-on-pad Physio.

Thanks to the double shim pockets on either side of the spine it is pleasantly soft, can be individually shimmed whilst staying securely put on the horse's back.

Hint: Healthy horses also enjoy the extra padding!

1 | Saddle Bag  
Trail 2-in-1

## 1 | Saddle Bag Trail 2-in-1

Practical bags with removable centre pouch.

We have thought of everything – the bags have two sturdy bottle holders, a separate pouch with velcro fastener for mobiles or GPS and long straps to attach to most saddles. Two easily accessible, spacious side pouches with logo offer plenty of practical storage space.

Innovative feature : The zippered centre pouch is attached via velcro and can be removed for rides where less luggage is required. Hidden under the centre pouch are two additional straps with clips to quickly attach blankets or coats.

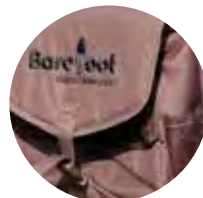

The bags are extremely light-weight (1.6 kg). Manufactured from 600D nylon with polyurethane coating, excellent for outdoor use due to its water and dirt repellent properties. All bags are padded, comfortable to use, shock-resistant and therefore horse-friendly.

- extremely light-weight (1.6kg)
- water and dirt repellent properties

6 | Backpack  
Walk-My-Horse

A Barefoot  
Horseaid  
1€

### 6 | Backpack Walk-My-Horse

Walking with your horse is important to establish trust. During a walk to discover new things together - while allowing your horse to learn about horse/human partnership and extend your ground work. It's especially good for young horses to learn to walk on the trail. There is much to explore – the more we do this from the ground with our horses, the safer they become under saddle.

For these walks and for pack horses we have come up with a great bag, with plenty of storage space, two large pockets, a bottle holder, GPS pocket, map pocket, straps for coats or blankets, etc...

The backpack, Walk-My-Horse™ has a removable, washable bottom (similar to a saddle pad), which is fastened with Velcro and is padded to support the spine.

It is fastened with a V-girthing system, allowing lots of room. It has a chest strap at the front and a waist belt in the middle - both with integrated elastic band and keepers for the strap.

- Backpack for walking with your horse or for pack horses
- ideal for young horses
- ideal for older horses that should not be ridden
- 9 pockets, some with a zipper or clip closure
- elastic V-rigging

Size of bags: 2 x H 28 cm,  
W 27.5 cm, D 9 cm

1 | Safety Stirrup with Hinges

## 1 | Safety Stirrup with Hinges

This safety stirrup has hinges which will move forwards and backwards. The stirrup will release the foot during a fall and will offer the rider comfort and flexibility during riding.

Made of rust free stainless steel, with changeable rubber inserts. Delivered in bag for easy storage.

- safety for the rider
- flexible
- tested up to 1.000 kg

Width of tread: 12.5 cm.

Art.No: SAFEST-HINGE

## 2 | Safety Stirrups, stainless steel

Made of high quality stainless steel with leather flap and elastic band on the other side. Will save you from getting your foot trapped in the stirrup during a fall, as the leather flap will open and release the foot.

Width of tread: 12.5 cm

Art.No: SAFEST

Kids size: Safety Stirrups Kids

Width of tread: 9 cm

Art.No: SAFEST-KIDS

## 3 | Soft-Step Stirrup

Lightweight Aluminium, with springy soft-step, suitable for wide leathers and fenders.

Width of tread: 11.5 cm

Black Art.No: STIR-WEST-ALU-01

Brown Art.No: STIR-WEST-ALU-02

## 4 | Western Stirrups Economy

Functional, leather covered stirrups, very durable. Deep surface area for the ball of your foot.

## 6 | Sevilla Stirrup

Sevilla Stirrups are made of high quality stainless steel in typical baroque style. Anti-Slip tread, medium heavy and chrome (shiny) covered.

Width of tread: 12 cm.

Art.No: STIR-SEV

## 7 | Tapaderos

These are safety stirrups for all western riders. Will prevent your foot from slipping through the stirrup - adds warmth during winter. The integrated stirrup is made of fiberglass, the cover is made of real leather, matching to all Barefoot® fenders and all others. Decorative leather conchas and leather strings.

Width of tread: 12,5 cm

Black Art.No: TA-01

Brown Art.No: TA-02

## 8 | Mono Dressage Stirrup Leathers

Dressage stirrup leathers made from soft, sturdy leather. Leathers are of single thickness – therefore less bulky, lighter and do not pinch.

Stirrup leathers fasten at top and bottom, with neat T-Buckles. Top buckle to fasten to the bars of the saddle; bottom buckle to adjust the length of leathers. Adjustment made from saddle is, therefore, easier and safer as rider's leg stays in contact with the skirt of the saddle.

Leathers have a strong nylon core to resist stretching. To avoid pressure caused by bulk under the rider's thighs, stirrup leathers under the seat flap are not leather covered.

The visible, lower T-Buckle is covered with a small leather sleeve.

- small buckle near the horse's back – no pressure
- no pinching of the rider's leg
- easy adjustment
- practical, save adjustment from the saddle
- nylon core - no stretching

Width: 2.5 cm, Length: 49 - 63 cm

Black Art.No: SL-MONO-01

Brown Art.No: SL-MONO-02

## 9 | Soft-Leather stirrup leathers

- no bothersome pressure along the thigh
- numbered oval holes
- no distortion due to nylon inlay
- soft and without sharp edge

Length: 130 cm, 145 cm

Black Art.No: SL-SOFT

## 10 | Fenders

Made of smooth durable leather. Inclusive hobble straps.

Buckles on the bottom to avoid bulk under the inner thighs. Well suited if you want to ride without chaps or boots: there's no pinching into your lower leg.

All our western stirrups will fit these fenders.

Width: 5 cm fits all saddles with this sign

Width: 2.5 cm fits all saddles with this sign

## 11 | Hobble Straps for Fenders

Replacement hobble straps for all Barefoot fenders and other fender brands.

1 | Saddle Girth System

2 | Anatomical Western Saddle Girth

### 1 | Saddle Girth System

The Barefoot girth system has two components. The top side is elastic and equipped with 4 stainless steel roller buckles. The lower part consists of a thick and soft padding surrounded by leather. The padding is able to adapt and therefore nestles softly to the horse's belly without following the movement of the saddle and the elastic component. Any kind of skin irritation and bruising in the girth area are avoided.

This system combines greatest safety during girthing with the utmost comfort for the horse. The d-ring can be flapped down when not needed.

- elastic girth does not inhibit the horse's breathing
- anatomically cut for elbow clearance
- roller buckles

Length in cm (measured from buckle to buckle)  
35, 45, 55, 65, 75, 85

Black Art.No: G/ENG-01  
Brown Art.No: G/ENG-02

### 2 | Anatomical Western Saddle Girth

Made of high quality leather, anatomically shaped. Soft padding. Large, flat and durable buckles made of stainless steel.

Ideal for sensitive horses.

- anatomical cut for elbow clearance
- flat buckles
- soft padding

Length in cm (from buckle to buckle):  
55, 65, 75, 85

Black Art.No: G/WES-01  
Brown Art.No: G/WES-02

### 3 | Sheepskin Saddle Girth

Super soft for sensitive girth positions.

The Barefoot sheepskin girth is made out of two components. 1. genuine sheepskin 2. sturdy nylon girth. Velcro firmly secures the two parts but allows for sheepskin to easily be removed for washing.

Sheepskins acts as a anti-allergen and minimises fungal attacks. The nylon girth has elasticated, tearproof straps on one side to allow the horse to breathe easily.

3 | Sheepskin Saddle Girth

- anti-allergen
- minimises fungal attacks
- elasticated and flexible
- easy-care due to removable sheepskin

Sheepskin is a natural product, small variances in colour and length of the fur is therefore normal. Please do not dry in direct sunshine and wash with special detergents. Lay flat after washing.

Length: 45 cm, 55 cm, 65 cm and 75 cm

Black Art.No: G/ENG-55

4 | Holder for girths and stirrups, leather

### 4 | Holder for girths and stirrups, leather

Convenient holder for stirrups or girth.

Finally a solution for all who are annoyed by the dangling of stirrups or girth especially when saddling or carrying the saddle: this practical holder is attached to the d-ring on the saddle and stays there as decorative and practical element during the ride.

Afterwards, just follow the holder through the girth ring or the stirrup – and they are neatly hung up.

- to fix your saddle girth to the saddle
- to fix your stirrup leathers to the saddle
- to fix to the saddle what needs to be fixed, f.ex. bags

Can not be used for wide Western stirrups.

Black Art.No: HOLD-STIR-01  
Brown Art.No: HOLD-STIR-02

**STRETCH  
& BREATH®**

5 | Girth Stretch & Breath®

NEW

**5 | Girth Stretch & Breath®**

The material for the Stretch & Breath® girth is specially made for us. It consists of many adjacent, fine elastic band envelopes, stitched with tear-resistant nylon thread. This gives us a material which is tear-resistant but also totally stretchy.

The Stretch & Breath® material is then wrapped with a soft, adjustable neoprene case that protects the horse's sensitive girth area.

Advantages of the Stretch & Breath® girth at a glance:

- completely elastic: the horse's breathing chest movement is not restricted

- Safety: with finely woven, tear-resistant nylon material
- Soft coated with neoprene
- backed roller buckles at both ends
- central ring for attaching martingale or breastplate
- The entire girth is machine washable

Length in cm: 35, 45, 55, 65, 75, 85  
Black Art.No: G/ENG-STRETCH

**STRETCH  
& BREATH®**

Products from the Barefoot range Stretch & Breath® are particularly comfortable for the horse:

The highly elasticated material used allows the horse to breathe, the rib cage can expand whilst saddle sits perfectly.

Girth are tear-resistant and will not lose shape.

## Contour Jewel

1 | Contour Jewels  
Bridle

Patented

Shaped headpiece  
takes pressure  
off the nuchal ligament  
attachment.

## Barefoot Contour

The sensitive area between the horse's ears – the atlas – represents the transition to the cervical spine, with the foramen magnum connecting the brain with the medulla. The atlas is also where the nuchal ligament starts, which is responsible for the whole chain of movements of the back. It is precisely here at the nuchal ligament onset that too much pressure / stress can cause inflammation. As a result, the horse is suffering great pain and movement is severely impaired ...

Barefoot has the horse friendly solution:

... The poll area of the Barefoot Contour headpiece is shaped so that no pressure is applied to that delicate area between the horse's ears. The centre of the headpiece is sharply bent forward and therefore lies in front of the nuchal ligament onset. The main bearing surface is on the neck muscle, left and right behind the ears. The area around the ears is shaped and softly cushioned.

### 1 | Contour Jewel Bridle

Barefoot – Designed FOR Horses!

This bitless bridle distributes the pressure gently and evenly across the nose and cheeks. It ensures aids are received without any pain and helps create trust between horse and rider.

The throat lashes are extensions of the reins – their cross-under design allowing the horse to understand aids easily without wrong flexion at the poll. This bitless bridle makes riding with the lightest aids possible: A short impulse/pressure on the left rein creates a pain free but distinct pressure on the opposite side of the horse's head. The horse moves away from the pressure on the right and reacts with bending to the left. Short impulse/pressure on both reins or alternate reins - your horse will give.

- bitless alternative for all riding disciplines
- patented Contour - headpiece
- even and gentle pressure distribution
- soft nose- brow and headpiece padding
- rhinestone decorated

Size 1 (COB), Size 2 (FULL)

Black Art.No: CON-BRID-JEWEL-01

# Contour WELLington

## 2 | Contour WELLington 2-in-1 Bridle

The Barefoot Bridle Contour is formed in such a way, that it spares the atlas, avoiding the application of any pressure. The browband and the noseband are shaped anatomically as well: The noseband is shaped upwards along the bridge of nose so breathing is not restricted.

2-in-1: The bridle can be used with or without a snaffle bit. The cheek piece can easily be removed or attached thanks to a Chicago-screw.

The brow-band as well as poll- and nose-band are padded softly completely, including the area of buckles and around the ears.

## Contour Physio

**NEW**

**1 | Contour Physio Bridle**

- anatomically shaped Contour headpiece (patented)
- exact fit to horse's head
- precise aids through perfect fit
- no slipping towards horse's eye
- many uses

Barefoot – Designed FOR Horses!

The solution: Not only for sensitive horses! For all styles of riding and lunging.

The Barefoot Contour Physio bridle can be precisely fitted to the horse's head as it is of a totally different design to traditional bridles.

1. The Contour poll area is shaped forward so that no pressure is applied to the sensitive area behind the ears where a nerve trunk attaches to the occipital bone.

The headpiece is softly padded and curved around the horse's ears – the ears have room, the headpiece nestles softly.

2. The cheek pieces and throat lash are thought through and fitted to the horse's head in a different way. The cheek pieces fork out, this y-shape prevents slipping: the horse's eye stays free! The bridle can be precisely fitted to the horse's head and stays in place.

Shaped headpiece takes pressure off the nuchal ligament attachment.

**NEW**

**3 | Shape-It Cavesson**

Innovation from Barefoot!

During basic training, groundwork and lunging aids should reach as precisely as possible - especially on the horse's sensitive head. Most cavessons used for this training unfortunately slip back and forth on the nose/head and make precise 'on the spot' aids impossible.

That is why we have been thinking and developed a nose piece which incorporates a sturdy, bendy wire: The noseband is shaped around this wire and can therefore be fitted to each individual horse's head. The nose piece stay in better position and does not slip.

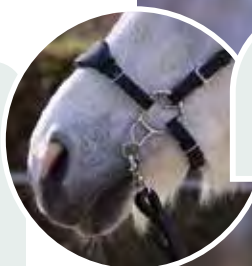

The Barefoot cavesson noseband is wide and comfortably padded. The 5 integrated rings allow for many possible uses.

**F**

The Barefoot Cavesson is even suitable for bitless riding: The reins are buckled to the outer rings. For lunging use the middle or one of the round, side rings.

We recommend using this noseband in conjunction with the Barefoot Contour Physio headpiece, which conforms perfectly to the horse's head, leaving the sensitive eye area free.

- lexible = customizable
- softly padded
- precise aids due to perfect fit
- non-slip
- sturdy rings, also suitable for bitless riding

The Barefoot Cavesson noseband can of course also be used with any standard headpiece.

Bit straps are included.

## 1 | Shape-It™ Noseband

Noseband Shape-It™ made of genuine Nubuck leather with rings fitted at each side for reins to be attached.

- noseband for bitless riding and groundwork
- flexible = adapts to the horse's nose
- suitable for all conventional bridles

Innovative feature: A flexible wire inside the noseband allows it to adapt to the horse's nose. The 'Shape-It' noseband therefore becomes more stable and does not slip so easily. More precise aids are guaranteed.

Fitting: The two top rings are simply attached to the cheek pieces of a conventional bridle. The noseband should be fitted 2-3 cm under the cheekbone.

With added bit straps Noseband 'Shape-It' can even be used with a bit.

Length 1: Pony to Thoroughbred, 68 to 78 cm  
Length 2: Warmblood to Draft, 72 to 81 cm

## 5 | Chin Strap elastic

Double-layered elastic chin strap for Hackamores or Western type headstalls. Aids are received clearly but softened by the elasticated part if applied to harshly.

Will not rub the sensitive chin area.

Black Art.No: HACK-CHIN-01  
Brown Art.No: HACK-CHIN-02  
Light oiled Art.No: HACK-CHIN-VIRG

## Mindset

### Barefoot Hackamores

Without bit to flexion and understanding between horse and rider!  
For riders who would like to communicate with their horses in a gently way.

The Barefoot hackamores attaches to the bridle in a similar way to a bit or hackamore. Your signals or aids via reins are mainly absorbed via the nose.

Recommended especially for horses with wolf teeth or other dental problems, horses with sensitive mouths, horses who lean on the bit, head shakers and bit „sour“ horses.

As soon as your horse has converted to bitless riding, any lesson can be taken – light flexion is possible.

In addition you will require a nose and chin strap, to secure to the horse's nose.

Hackamore  
Light oiled

5 | Chin Strap  
elastic

4 | Hackamore  
Flower

3 | Barefoot  
Bitless Bit

#### 3 | Barefoot Bitless Bit

Suitable for Dressage lessons!

Attached the Barefoot Bitless Bit lies flat against the horse's head and does not cause pinching when in use. Nose and chin straps attach to outward lying metal eyelets and therefore do not assert pressure on to the horse's head. Precise aids can be given.

Reins can be attached in various ways: with or without leverage effect.

Further information under: [www.barefoot-saddle.com](http://www.barefoot-saddle.com)

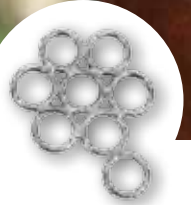

Art.No: HACK-BB

#### 4 | Hackamore Flower

Like a bit, the Barefoot Hackamore Flower attaches left and right to the bridle only that your horse has no „metal in his mouth“.

Your aids are transmitted via the horse's nose. As soon as your horse has converted to bitless riding, any lesson can be taken – flexion is possible. The Barefoot Hackamore Flower allows for some leeway. The rein action/control is variable depending on which ring is used. The strongest effect is achieved when rein is attached to the lowest ring (light leverage).

## 1 | Walnut Bitless Bridle

The humane alternative for all riding styles.

Our bitless bridle distributes the pressure lightly and evenly over the nasal bone, the cheeks and the poll. It does not create punctual pressure in just one spot and therefore provides pain free and safe rein aids which increases the trust between horse and rider.

The throat latch is the extension of the reins – due to the criss crossed reins the horse understands your aids easily which will help you to put her/him on the bit without twisting or false bending at the poll. Bitless bridles work very well with even the slightest pressure; e.g. quick halfhalt on the left rein triggers a steady but pain free pressure on the opposite side of the horse's head. The horse evades the pressure on the right and turns to the left. If you apply light pressure on both reins or right and left on the individual reins – your horse will yield and give at the poll.

Very suitable for every riding style, Western, English, Endurance or trail – even lunging. As with all new equipment we suggest to try the bitless bridle in a fenced in area first. The noseband should be resting 2 cm above the mouth crease and you should be able to get 2 fingers under the noseband.

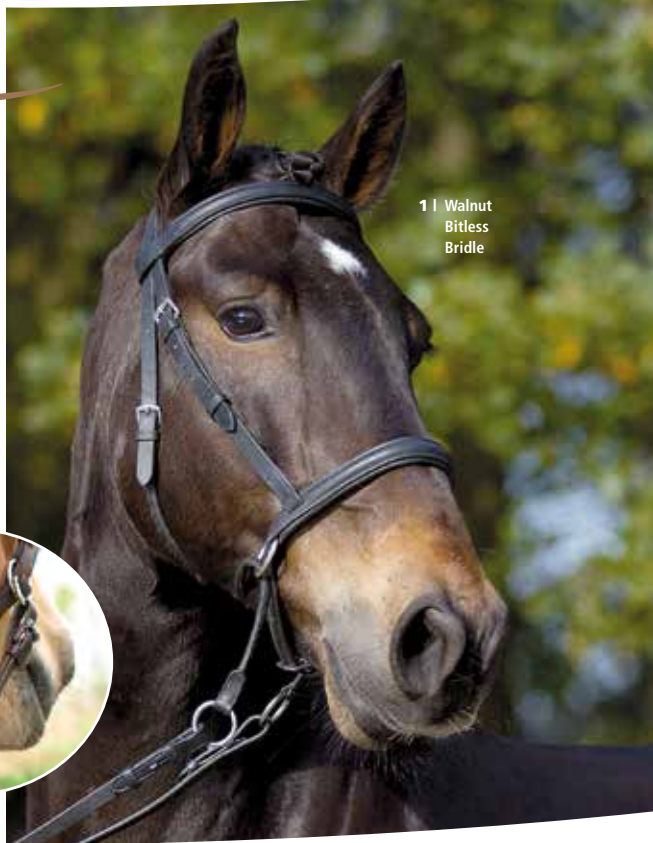

Our bitless bridle is an especially gentle design. Noseband, crown piece and browband are all nicely padded. The crown piece is extra wide and has a thick padding to reduce pressure behind the ears.

- mild and even pressure distribution without force
- soft nose, browband and poll padding
- crown piece extra wide with a thick padding

Sizes: 1 (COB) and 2 (FULL). Also available in size pony, see page 27.

Bridle

## 2 | Anti-Slip Reins Super-Grip

Reins made of anti-slip material useable with all 'english' bridle types. The weaved through rubber material ensures that reins stay securely in rider's hands without slipping.

Length of reins 275 cm.

Black Art.No: REIN-SG

## 3 | Leather Cleaner

Thoroughly removes dirt and sweat. Easy use: simply spray on, rub in lightly and remove residue.

Spray bottle 500 ml Art.No: LEDREIN

## 4 | Leather Cream

Designed for open pored leathers. Protects leather from outer influence and keeps it nice and supple.

Pot 200 ml including sponge  
Art.No: LEDCREME

## 5 | Leather Colour Cream

It prevents light damage, restores and rejuvenates colours of faded leather.

Pot 100 ml including sponge  
Black Art.No: LEDFARB-01  
Brown Art.No: LEDFARB-02

## Barefoot Leather Care

Do not use grease or wax for the care of nubuck or soft leather as it will cloak the leather's pores. We recommend our leather care range:

# Syringa

## 6 | Syringa Bridle 2-in-1

Our Bridle Syringa can be used without a bit as side-pull or as a Bitless-Bridle with crossed reins – see below.

It is great to be used for ground work or longeing.

Browband and crown-piece are padded softly. The crown-piece is extra wide and thickly padded, so it reduces punctual pressure behind the ears noticeably. Pressure is applied onto the bridge of the nose by two doubled ropes, which are tied together along the side.

Comes with matching reins in a leather-robe combination with snap-hooks.

- bitless alternative for all styles of riding
- soft and even distribution of pressure without force
- softly padded brow-band
- crown-piece is extra wide and thickly padded
- embroidery on browband and cheekpiece
- including reins

Sizes: 1 (COB) and 2 (FULL)

4 | Mecate Real Hair

## Oaklet

### 1 | Oaklet Headstall

With genuine rawhide!

Beautiful Western headstall made from genuine high-quality nubuck leather with contrasting colours and decorative braids in the browband and cheek pieces, which are made from real rawhide.

Designed for use with the Barefoot bosal, or with a hackamore.

Highly adjustable – fits small horses to warmbloods

- chicago screws for secure closure
- fashionably knotted browband
- semi-circular stainless steel buckles
- attractive Barefoot conchos

Art.No: BRID-OAK-1/2-02/NA

### 2 | Oaklet Reins

Genuine rawhide braided leather reins!

Fantastic open ended reins made from genuine, high quality dark brown Nubuck leather. Braided, partially weaved into the leather, rawhide decorations.

Reins are quickly and easily attached to a bit, hackamore or rings (bitless bridles) with leather tabs and secured by decorative leather ties.

A small, movable leather loop holds both reins together.

Length per rein: 225 cm, Width: 15 mm

Chocolate Art.No: REIN-OAK

### 3 | Barefoot Bosal

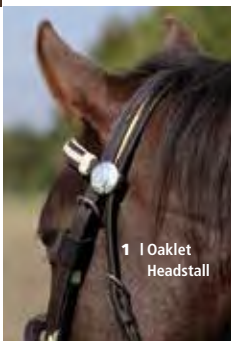

Traditional bitless alternative.

- braiding with rawhide
- with leather core
- used in conjunction with a mecate

# Acorn

## 1 | Acorn Bridle 2-in-1 with genuine rawhide

High quality finished, horse-friendly Sidepull made of soft, supple Nubuck Leather with genuine rawhide nose- and browband. The Sidepull (noseband) can easily be removed via quick-change snaps and can also easily be fitted with a bit.

Switch with ease, without bit – with bit – it only takes seconds!

Eye-catching two-colour genuine rawhide decorations on brow- and noseband. The headpiece is particularly softly padded. The padding is covered with genuine soft leather.

Headpiece is adjustable on both sides with attractive stitching.

The throatlash and matching reins (see below for matching items) are made of braided, chocolate brown rope.

- bitless or bitted within seconds
- quick-change ends
- headpiece extra soft and padded
- with genuine rawhide
- matching reins available

Sizes: 1 (COB) and 2 (FULL)

Art.No: ACO-BRID-02

## 1 | Acorn Bridle 2-in-1 with genuine rawhide

1 | Seneca Riding Halter 3-in-1

### 1 | Seneca Riding Halter 3-in-1

Knotted Rope Halter or Bridle?

The Barefoot Seneca Bridle is a thought through ‚Knotted Rope Bridle‘ with 3 functions: Can be used as a standard halter for ground work, as a Bitless Bridle or with a bit which can easily be attached via the leather loops. The ‚Knotted Rope Bridle‘ has four stainless steel rings and adjustable knots to fine tune fitting to your horse’s head. Bridle can also be used with mecate reins

Material: polypropylene with cotton core / rawhide nose & browband. With genuine horse-hair tassel.

Please do not turn out your horse in this halter – use halters with Break-Away-features (see page 56 and 57).

- 3 functions
- individually adjustable
- decorative covered with rawhide

Matching reins available.

Size 1 (Riding Pony/Thoroughbred/Haflinger),  
Size 2 (Warmblood/Coldblood)

Chocolate/Natural

## Seneca

2 | Seneca Reins

## Peony

3 | Peony Bridle

### 3 | Peony Bridle

Bitless Bridle made from thick, braided cotton rope. Very smooth and light weight, yet stable. Including two long reins, and leather patches with logo. Adjustable on the side. The chin-parts prolong the reins and run through rings which are attached on both sides: this allows the nose-band to tighten and thus signals the horse to change direction or speed.

- simple bitless alternative for all styles of riding
- soft distribution of pressure without force
- extra long reins
- soft and stable material

Black Art.No: BRID-PEO

### 2 | Seneca Reins

With braided rawhide decorations.

Stunning, closed up reins from the Seneca Range. Barefoot Reins Seneca are made of durable polypropylene with cotton inner core. Decorations are braided from quality, two-colour rawhide.

Karabiner Snap Hooks allow for quick attaching and detaching of reins to bridle.

Length: 3.50 m

Brown Art.-Nr. SEN-REIN-02

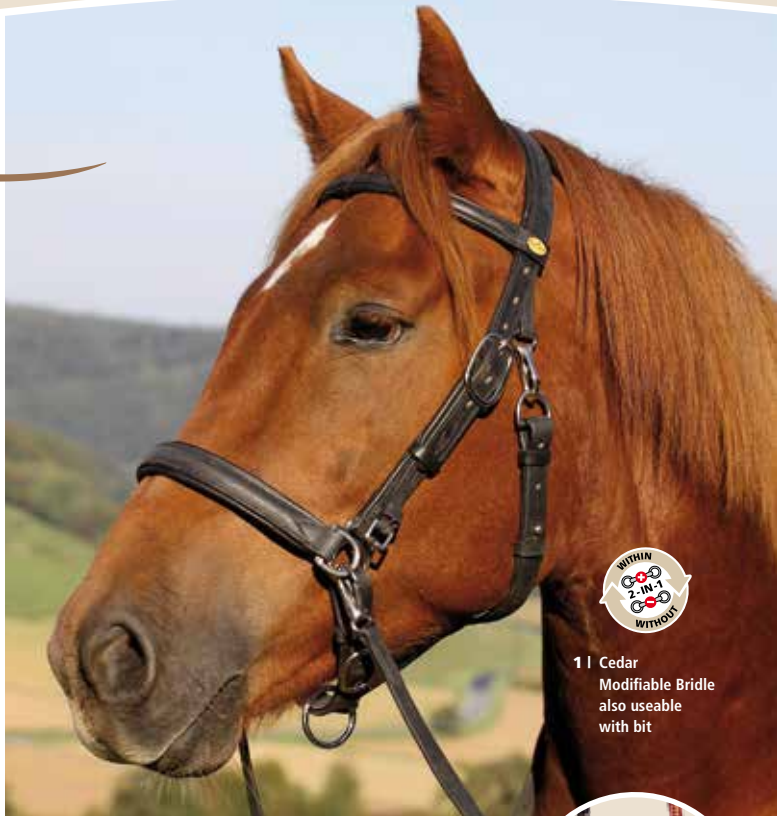

# Cedar

## 1 | Cedar Modifiable Bridle

This Barefoot bridle comes with multiple adjustment possibilities. Crown piece, noseband and throat latch can be adjusted on both sides and can be fitted from a pony to a warmblood. The bit can easily buckled on and off. The throat latch can be removed completely and the bridle can be used as a halter. The noseband is softly padded and has 2 additional rings to attach reins and ride bitless.

Our recommendation: The entire bridle should be buckled loosely; the noseband should have ample room so it does not interfere with the horse's breathing.

Leather reins and a nice lead rope made of a leather/nylon combination with panic buckle are included.

1 | Cedar Modifiable Bridle also useable with bit

1 | Cedar Modifiable Bridle also useable as halter

- perfect for trail riding
- lead rope included
- Leather reins included
- to be used with or without bit
- made of soft nubuck leather

**Brown with bordeaux colored lead rop** Art.No: BRID-CED-02

lead rope included

2 | Browband Set 2-in-1 with Fly Protection

## 2 | Browband Set 2-in-1 with Fly Protection

Innovation from Barefoot – Exchangeable browband with fly protection.

The softly padded, leather covered underside has a velcro fastening upper to which you then have the choice to either attach a:

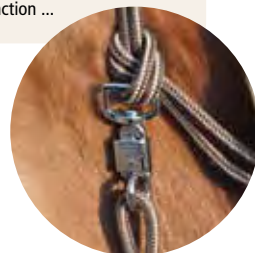

1. Upper part made of leather.
2. Upper part (Leather) with incorporated fly fringes (nylon). Both are included in the set so the browband can easily be changed in seconds.

- quick function change
    - a. fly fringe
    - b. fly protection or regular browband
  - suitable for use with most bridles
  - soft padding made of soft leather
  - fly fringes stay where they should
- Black smooth leather** Art.No: FLYV-PLN-01  
**Black Nubuck (embroided)** Art.No: FLYV-NUB-01  
**Brown Nubuck (embroided)** Art.No: FLYV-NUB-02

No annoying slipping as with conventional fly-fringes, the fringes stay where they should!

NEVER tie your horse with this halter or put it on pasture. For that purpose, use a halter with break-away-function ...

### 5 | Panic Snap, small

- ideal for knotted rope halters
- quick release for safety
- rust free stainless steel

Art.No: PANIC-HOOK-MINI

## Juniper

### 1 | Juniper Halter 3-in-1

Juniper Halter 3-in-1 Pictured without bit

Juniper Halter 3-in-1 Pictured with bit

### 1 | Juniper Halter 3-in-1

Knotted halter with special features. Smart knotted halter with three special features: one can use it for ground-work, as a bitless bridle or use with bit or hackamore. Matching reins and rope available. The halter comes with five rings made from rust-proof steel. Thanks to the knots the halter can easily be fitted to the horse's head.

Material: polypropylene with cotton core.  
Sizes: 1 (COB) and 2 (FULL)

Brown/Ivory Art.No: JUNIPER-HALT

### 2 | Halfter 2-in-1, real leather

The Barefoot® leather halter has two exchangeable crown pieces – both with horse friendly function:

1. In all cases when the horse has to be tied securely: Locked crownpiece made from soft nubuck-leather with thermo elastic padding – formed anatomically to fit the horse's poll so that the onset of the ears is free of pressure.
2. To tie and to turn-out: Crown-piece with break-away-function, softly padded with real lamb fur. The crown-piece is doubled and attaches with Velcro. In case the horse should panic, step into the halter or get hooked to the fence, the Velcro fastening opens.

Size 1 (COB), Size 2 (FULL)

4 | Halter Stretch & Breath®

### 4 | Headcollar Stretch & Breath®

Pretty and functional.

The Barefoot Stretch & Breath® halter uses elasticated material in the poll and nose area which will give should your horse get into a situation it has to free itself from. The horse can slip off the halter without it losing its shape or function and therefore can then be used again.

The headcollar is ideal for use in paddock, field or on young horses which are not, as yet, used to being tied up.

Included with the headcollar are a real sheep-wool sleeve for both noseband and headpiece. Sleeves can be removed as they are velcroed on. For added safety, headcollar is closed with a small panic hook

which can be opened with one hand and gives additional safeness.

The article is washable at 30° – please remove the cover from sheep's wool and wash separately by hand. Pull into shape before drying.

Stretch & Breath material in black, fur saver in nature.

5 | Barefoot Communication Trainer-Stick 4-in-1

**NEW**

### 1 | Barefoot Communication Trainer-Stick 4-in-1

This is how horse experts train!

- our different uses
- as lunge whip
- as groundwork stick
- for target training
- incl. acoustic signal

It could hardly be more versatile! Many possibilities and ideas are hidden within our Barefoot Communication Trainer Stick for work with your horse on the ground.

For lunging it can be used as lunge whip, as target stick for target training, as groundwork stick and we additionally supply a small bell with which you can train your horse to react to acoustic signals.

2 | Lunging Bit Expert

### 3 | Lungeline Super-Grip

The somewhat different lunge-line made from non-slip super-grip material – created by Barefoot.

The lunge-line is extremely light weight (weighs just 370 gram). It is comfortable to hold and the super-grip material made from nylon with a special rubberized fabric woven in, ensuring a secure hold even when wet.

The lunge-line is equipped with a large, sturdy snap with rotator so it will move along when changing sides. Really smart is the decorative stopper at the end.

The last four meters are marked with different colours each, so you are always aware about the current length when lunging and doing ground work.

- made from non-slip material
- coloured marks to control length
- rotating snap
- stabil stopper at end

Length: 8 m

Black Art.No: LUNG-LINE-SG

### 2 | Lunging Bit Expert

Lunging with common-sense.

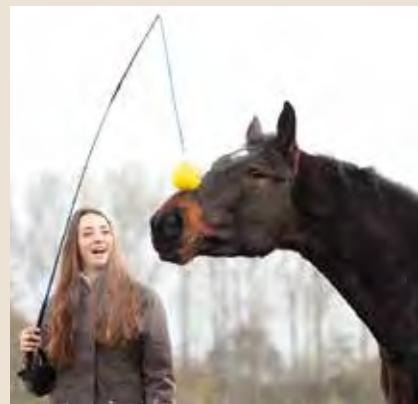

The Barefoot Lunging Bit Expert does away with annoying snaps, but offers a smart Quick-Change fastening made from real leather.

The ring for attaching the lunge turns and moves freely so it doesn't jerk the horse's mouth – the horse can easily be directed into a different direction.

Black  
Art.No: LUNG-BIT-EXP

3 | Lungeline Super-Grip

Art.No: TRAINERSTICK-4-IN-1

The 'Communication Stick' is easy to handle and very well balanced. Due to its many uses it not only saves room but is also price effective.

Stick comes in colour blue, soft ball in yellow and lashes in white. Studies have shown that horses can distinguish these colours best from their surroundings and therefore absorb and understand commands much faster.

Sold inclusive:

- stick with rubber grip handle
- short lash
- long whip lash with leather popper at one end
- soft ball to attach to stick for target training
- little bell to attach to stick

Contour WELLington  
2-in-1 Bridle

Super-Grip

4 | Surcingle  
Save-My-Spine,  
Real Leather

### Lunging and therapeutic riding WITHOUT pressure to the withers

Most lunging, vaulting and therapeutic riding surcingles apply nutcracker-like pressure onto the horse's withers – either to the sides or on top of the spinous processes.

We have solved this problem: underneath the Barefoot surcingle the withers remains unrestricted and there is no pressure – neither onto the withers nor along the sides. The supports on both sides are padded softly and extra wide, so that muscles can develop – without being squeezed.

#### The following applies to both surcingles:

Five (!) sturdy rings are applied on both sides, so all auxiliary reins such as side-reins can be attached, but also long-reins or double lunging rein can be used in various positions. The surcingle is made from genuine, sturdy leather, with a soft and adjusting underlay made from foam which is covered by suede leather.

Surcingle can be used with standard dressage girth. See page 40 and 41.

#### 4 | Surcingle Save-My-Spine, Real Leather

The fibreglasinlay – size medium – fits almost all back, but can be exchanged – our other inlays can be used. (see page 31).

Black Art.No: SURCINGLE

#### 5 | Surcingle with handles

The handles are anatomically shaped giving a save hold even for small hands. The surcingle therefore becomes an ideal training aid for beginner riders and for therapeutic riding.

The front inlay with handle has size wide. It can be adjusted to your horse' shoulder by shimming the underlay. The handles can easily be removed and exchanged with a Barefoot insert without handles.

The lowest rings left and right on the surcingle are movable and can be taken off to allow the surcingle to be girthed higher for horses with narrow rib cages.

- surcingle without nutcracker-effect
- with wither clearance
- anatomically shaped handles
- for beginner training and therapie
- real leather, softly padded

\*Our clothes sizes are valid for Germany

These symbols show, in which size a saddle is available.

Always indicate in your order.

Barefoot Saddles are hand made. This makes every saddle unique. The measurements are therefore just reference points and can vary slightly.

### Please note:

The length of saddle (A) is the overall length. Since there is no pressure at all in the rear part, the horse can move freely. Even if the saddle looks a little too long on your horse, choose the size according to your measurements. It is very important that the saddle fits the rider well, so he has enough space between thighs and pommel and does not sit on the pommel or cantle, which would limit the saddle's adaptability. The horse's back is free of any pressure at the rear – the Barefoot can even be lifted slightly at the cantle with a rider on board.

### How to find the correct fender or stirrup leather:

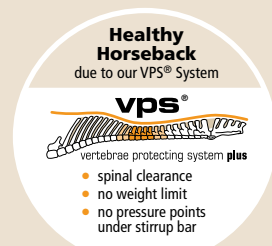

These symbols show the width of the matching stirrup leathers.

Articles with these symbols have special, horse-friendly features.

### Barefoot Saddle Models:

See also page 3.

Velcro Stirrup Attachment allows free positioning

V-Girthing, even works for critical Horse Girth Areas

Air can circulate allowing the knee roll to conform to the rider's leg more softly

### Barefoot Bridles/Halters:

Bridle to be used with or without bit

Patent: Anatomically shaped Head Piece

Break-Away function gives your horse free in dangerous situations

## Exchange Pommels

All Barefoot saddles can be adjusted to suit horses with different shoulder conformations through the easy change of the pommel insert.

Exchange Pommels see page 31.

A detailed instruction 'How to correctly change the Barefoot pommel' can be found under: [www.barefoot-saddle.com/de/out/pictures/wysiwigpro/pdf/instruction-front-pommel.pdf](http://www.barefoot-saddle.com/de/out/pictures/wysiwigpro/pdf/instruction-front-pommel.pdf)

## 1 | Barefoot Fleece-Saddle

Fleece-Saddle with ‚Physio‘ Underside.

Barefoot Fleece-Saddle made from real sheep wool.

The large knee rolls add support to the rider’s legs whilst the high, soft cantle encloses and supports rider at the back.

The underside is made of Sympanova to prevent slipping on horse’s back.

The underside has an additional shimable pad that is velcroed on. Included are 2 sets of shims (1 pair of cellular rubber shims and 1 set of soft PU foam). The shimable pad ensures spinal clearance and also additional protection for the horse’s back. Difficult saddle positions can be balanced by cutting shims.

The Barefoot Fleece-Saddle has no stirrup attachments to avoid any pressure on the horse’s back muscles.

With most bareback pads or fleece saddles, girth attachment runs straight across the back and puts pressure on one or two spinous processes – the Barefoot Ride-On-Pads and the Barefoot Fleece-Saddle are more horse-friendly: The concealed girth straps are mounted centrally on skirts and therefore distribute pressure over the whole area.

The Barefoot Fleece-Saddle gives the rider a secure, comfortable seat close to the horse and is stable on the horse’s back due to non-slip underside.

- D-Rings to secure bags
- Nylon carry handle
- horse-friendly rigging
- non-slip, shimable underside
- large knee rolls and secure seat

● including  
2 sets  
of shims
